

SCIENCE AND FAITH

SCIENCE & FAITH: ENEMIES OR FRIENDS?

Friday May 24, 7-9:30pm

St Hilary's Kew, 12 John St Kew

In an increasingly secular and scientific culture, one of the biggest challenges to Christians is the so-called conflict with science. Can science and faith be friends? Or are they just too opposed? This talk and panel discussion with scientists tackles the so-called conflict between science and faith.

We are joining with ISCAST – Christians in Science, and we are inviting all youth who are concerned about the relationship between Science & Faith to attend and invite their friends of various beliefs. Don't miss out!

This is a free event with a \$5 donation for supper.

Headline speaker: James Garth - Rocket Scientist
